SCIENCE TO SAGE

MAGAZINES + INTERVIEWS + GALLERIES

Karen Elkins

PUBLISHER · AUTHOR·SPEAKER·VISUALSTORYTELLER

Bridging science and ancient wisdom, an art canvas for science.

"A compelling synthesis of modern science, ancient wisdom and timeless art melded into a revolutionary view of the universe, and our lives!"
Gregg Braden, on InsideOUT

"A visual feast... Rarely has science and art been blended in so effective a way."
Gerald Pollack, PhD, on InsideOUT

Science to Sage Karen Elkins

SPEAKING TOPICS TO-DATE

- **The Red Thread — Ancient Wisdom to Modern Technology**

Tracing the connections between ancient knowledge, creation, scientific discovery, and modern innovation.

- **From the InsideOUT — Connecting the Dots of Creation**

A visual journey through science, geometry, ancient wisdom, and the mysteries of existence.

- **The Optical Universe — Light, Geometry and Reality**

Exploring light, wave phenomena, and the patterns underlying our physical world.

- **Water's Secrets — From Cosmology and Biology to Technology and Geometry**

Exploring water's extraordinary properties and its relationship to biology, energy, geometry, and life.

- **The Holographic Universe — Patterns Within Patterns**

Discovering connections between geometry, fractals, cosmology, and the nature of reality.

- **Life: Micro to Macro — As Above, So Below, So Within**

Revealing nature's underlying design through mathematical patterns and geometric structures, from the microscopic to the cosmic.

- **The Frequency of Life — Resonance, Sound and Form**

Exploring vibration, cymatics, standing waves, and the role of resonance in shaping patterns and form.

- **Man, Machine and the Living Matrix — Nature as the Blueprint**

Exploring how nature's mechanics inspire human ingenuity, technology, and innovation through biomimicry.

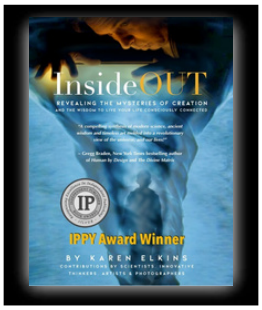

- **Fact or Fiction? — Mythology, Ancient Technology and the Human Story**

When did fact become fiction? Exploring ancient stories, forgotten knowledge, and striking parallels with modern science. Are today's discoveries truly new, or are we rediscovering the past?
